NOTES

10. These lowering springs can only be used with shortened shockabsorbers.
11. Not suitable for cars with level adjustment.
13. Not suitable for 4WD (four-wheel drive) cars.
14. Not suitable for station wagons.
16. For models up to 8/79, the original springs holders (Art.No.861412113B) must be used on the front axle.
21. Excluding M-models, S4 models and cars with Audi sport chassis.
25. The bumpstop must be shortened o 45 mm.
27. Not suitable for "Turbo" models.
33. Not suitable for GT/GL/GTE/GLE/GSI models.
44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
45. We recommend to use shortend shockabsorbers for this set.

NOTES

4. Not suitable for models with EDC-system.
10. These lowering springs can only be used with shortened shock absorbers.
11. Not suitable for cars with level adjustment.
12. Not suitable for cars with automatic or electronic shock absorbing regulation.
21. Excluding M-models, S4 models and cars with Audi sport chassis.
25. The bumpstop must be shortened to 45 mm.
26. In the case cars with a level regulation facility, the rear of the car can be lowered by approx. 15mm if desired by changing the settings on the level regulation system.
44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
65. TUV is not suitable for 540i
77. Only suitable for Touring cars with air suspension at the rear(set contains only front springs)

NOTES

9. Set only contains two rear springs.
10. These lowering springs can only be used with shortened shockabsorbers.
11. Not suitable for cars with level adjustment.
12. Not suitable for cars with automatic or electronic shock absorbing regulation.
13. Not suitable for 4WD (four-wheel drive) cars.
14. Not suitable for station wagons.
19. Not suitable for cabriolet, convertible designs.
25. The bumpstop must be shortend to 45 mm.
45. We recommend to use shortend shockabsorbers for this set.
64. The front bumpstop must be shortend to 20 mm.

NOTES FORD							
4. Not suitable for models with EDC-system.							
6. Not suitable for 16V/20V/24V and RSI models.							
10. These lowering springs can only be used with shortened shockabsorbers.							
11. Not suitable for cars with level adjustment.							
12. Not suitable for cars with automatic or electronic shock absorbing regulation.							
13. Not suitable for 4WD (four-wheel drive) cars.							
14. Not suitable for station wagons.							
24. Lowering only suitable at the front axle.							
31. The indicated lowering is the effective lowering. Standard lowering has already been considered.							
34. Conical front spring.							
35. Cylindrical front springs.							
45. We recommend to use shortend shockabsorbers for this set.							
48. This set is only useable with the original shock absorber. With other shockabsorbers the lowering set will not have enough preload.							
67. Cut off 1 ring from bump rubber

NOTES

3. Not suitable for 4WS (4 wheel steering) models.

13. Not suitable for 4WD (four-wheel drive) cars.

14. Not suitable for station wagons.

45. We recommend to use shortend shockabsorbers for this set.

53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place

73. From chassis nr.: 400 001

74. Till chassis nr.: 400 000 / set contains two different front springs, see code on springs

NOTES MB

8. Not suitable for cars equipped with standard sportsuspensions.

9. Set only contains two rear springs.

11. Not suitable for cars with level adjustment.

13. Not suitable for 4WD (four-wheel drive) cars.

15. Not suitable for cars with hydropneumatic suspension.

19. Not suitable for cabriolet, convertible designs.

20. Mounting instructions for W201/202/123/124/126: Max. lowering is obtained by using single points (single stud) spring rubber bases on the front and rear axles. In case, the 3 point or 4 point rubber bases installed by the manufacturer have to be exchanged accordingly (spare part available from DB agents) in case of corresponding accessories, as automatic shifting, air conditioning etc. However on the front the 3 point or 4point rubber bases must always be used in case of trailer operation (trailer coupling) on the rear axle, 3 point rubber basses must always be used.

36. Not suitable for cars with Full Options.

37. Only for cars with Full Options.

44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.

70. The MB E-class S211 has standard level adjustment at the rear. So the car can be lowered at the back by setting the level adjustment. Therefore this set only contains frontsprings.

NOTES NISSAN							
9. Set only contains two rear springs.							
11. Not suitable for cars with level adjustment.							
13. Not suitable for 4WD (four-wheel drive) cars.							
14. Not suitable for station wagons.							
27. Not suitable for "Turbo" models.							
53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place							
55. Mount the rear spring with the progressive part up !!, this is very important.							
80. Not suitable for Qashqai+2

NOTES OPEL

9. Set only contains two rear springs.
10. These lowering springs can only be used with shortened shockabsorbers.
11. Not suitable for cars with level adjustment.
13. Not suitable for 4WD (four-wheel drive) cars.
14. Not suitable for station wagons.
23. We recommend to shorten the bump stops to 30mm.
28. Special Tuning set. Installation must be done by professionals due to the extreme lowering of this setmodification may be necessary.
31. The indicated lowering is the effective lowering. Standard lowering has already been considered.
32. Not suitable for Kadett City.
34. Conical front spring.
35. CYL.indrical front springs.
40. Not suitable for cars with Air Conditioning.
41. By choosing the lowering please note that the standard ride height in the front and in the rear is very different. After installations the lowering often appears to be different from the indicated lowering in the catalogue.
44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
45. We recommend to use shortend shockabsorbers for this set.
50. Mount the front spring with the progressive part up !!, this is very important.
51. Take a good look how to mount the rear springs, this is very important.
53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place
55. Mount the rear spring with the progressive part up !!, this is very important.

NOTES

3. Not suitable for 4WS (4 wheel steering) models.
6. Not suitable for 16V/20V/24V and RSI models.
24. Lowering only suitable at the front axle.
33. Not suitable for GTI/GLI/GTE/GLE/GSI models.
45. We recommend to use shortend shockabsorbers for this set.
47. The bumpubber from the front: cut one ring off from the middle of the rubber and glu the top back on.
51. Take a good look how to mount the rear springs, this is very important.
53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place
54. Mount the rear spring with the white mark to the rear. This is very important.
55. Mount the rear spring with the progressive part up !!, this is very important.
56. Mount the rear spring with the progressive part down !!, this is very important.

NOTES

10. These lowering springs can only be used with shortened shockabsorbers.

11. Not suitable for cars with level adjustment.

24. Lowering only suitable at the front axle.

44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.

45. We recommend to use shortend shockabsorbers for this set.

46. Cut off one ring from the top of the bump rubber, always cut from the top.

69. TUV only suitable with normal original bumpstop or sport original bumpstop. Do not shorten the bumpstops!! With the sport bumpstop the lowering will be a little more and also the driving will be better.

NOTES

6. Not suitable for 16V/20V/24V and RSI models.
8. Not suitable for cars equipped with standard sportsuspensions.
9. Set only contains two rear springs.
10. These lowering springs can only be used with shortened shockabsorbers.
11. Not suitable for cars with level adjustment.
13. Not suitable for 4WD (four-wheel drive) cars.
16. For models up to 8/79, the original springs holders (Art.No.861412113B) must be used on the front axle.
17. For models up to 8/79, the original springs holders (Art.No.171412341A) must be used on the front axle.
18. For cars from 10/93, it may be necessary, due to different spring holder sizes on the front axle, to use the original spring holder (Art.No.1HO-412-341).
22. For 16V + VR6 and TDI, we recommend to change to sportshock absorbers.
24. Lowering only suitable at the front axle.
28. Special Tuning set. Installation must be done by professionals due to the extreme lowering of this setmodification may be necessary.
29. The indicated lowering can differ up to 25mm due to different models and options.
30. Not suitable for VR-6 models with Air Conditioning.
31. The indicated lowering is the effective lowering. Standard lowering has already been considered.
38. Not suitable for cars with Automatic Transmission.
43. Not suitable for G40 models.
44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
45. We recommend to use shortend shockabsorbers for this set.
66. The front bumpstop must be shortend 15 mm from topside.
69. TUV only suitable with normal original bumpstop or sport original bumpstop. Do not shorten the bumpstops!! With the sport bumpstop the lowering will be a little more and also the driving will be better.
71. This partnumber is not GOCA (TUV) approved for Belgium.
78. Not for California

NOTES VOLVO							
6. Not suitable for 16V/20V/24V and RSI models.							
11. Not suitable for cars with level adjustment.							
13. Not suitable for 4WD (four-wheel drive) cars.							
14. Not suitable for station wagons.							
24. Lowering only suitable at the front axle.							
49. For the Volvo V70 with automatic level adjustment, you can use the original shockabsorber from the Volvo S80. (Most of them don't have automatic level adjusted shockabsorbers). Original Volvo shockabsorber: 8671-712							
53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place							
56. Mount the rear spring with the progressive part down !!, this is very important.							
57. Mount the front spring with the progressive part down !!, this is very important.							
75. Not suitable for cars with multilink rear suspension							
76. Not suitable for cars with sportsuspension + S-line							
SPECIAL SETS FOR INCREASED RIDE HEIGHT							
HIGH5010	99006	CUSTOM WAGON HDJ80				+50MM	
HIGH5011	99002	LANDROVER DISCOVERY				+30MM	
HIGH5004	99019	OPEL FRONTERA		1996-		+50MM	
HIGH5013	99007	SUBARU VIVIO				+50MM

HIGH5002	99003	TOYOTA LANDCRUISER		10/1991-			
HIGH5009	99025	TOYOTA LANDCRUISER	LJ7	1991-		+60MM	
INFORMATION							
ESSEMBLY							
We recommend to have the installation of our lowering springs done by a specialist workshop having the experts and special tools. Prior to assembly, it is absolutely necessary to read the TUV expertise comparing it with the data of the car and the delivered chassis part in order to exclude future assembly and technical problems concerning the TUV.							
BRAKE POWER REGULATOR							
In the case of cars which are equipped with load-dependent brake power regulator on the rear axle, we recommend to check this regulator and in case, to have it re-adjusted by your specialist workshop.							
ABS							
In case of cars with anti-blocking system, the sensors have to be accurately re-adjusted after mounting our lowering springs.							
LEVEL ADJUSTEMENT							
For cars equipped with level adjustment, it must be re-adjusted after mounting our lowering springs.							
WHEEL ADJUSTEMENT							
After mounting our lowering springs, the wheel adjustment values have to be checked.							
MEASURING METHOD							
The lowering indicated by us results from the difference between the standard ride-height (distance between fender and the center of the wheel) and the ride-height after lowering. You should take into consideration that in case of lowering carried out by the factory, the dimensions are reduced by this lowerage.							
WARRENTY							
Complaints are only received and processed if the by De Merwede b.v. sended complaintform has been filled in and returned properly. Returns are subjected to prior agreement and will be effected "delivered domicille".							
Notes							
1. Not suitable for Diesel models.							
3. Not suitable for 4WS (4 wheel steering) models.							
4. Not suitable for models with EDC-system.							
5. Not suitable for models with High-Ground-Clearing (HGC) systems.							
6. Not suitable for 16V/20V/24V and RSI models.							
7. For standard lowered cars; only suspensionkits are recommended.							
8. Not suitable for cars equiped with standard sportsuspensions.							
9. Set only contains two rear springs.							
10. These lowering springs can only be used with shortened shockabsorbers.							
11. Not suitable for cars with level adjustment.							
12. Not suitable for cars with automatic or electronic shock absorbing regulation.							
13. Not suitable for 4WD (four-wheel drive) cars.							
14. Not suitable for station wagons.							
15. Not suitable for cars with hydropneumatic suspension.							
16. For models up to 8/79, the original springs holders (Art.No.861412113B) must be used on the front axle.							
17. For models up to 8/79, the original springs holders (Art.No.171412341A) must be used on the front axle.							
18. For cars from 10/93, it may be necessary, due to different spring holder sizes on the front axle, to use the original spring holder (Art.No.1HO-412-341).							
19. Not suitable for cabriolet, convertible designs.							
20. Mounting instructions for W201/202/123/124/126: Max. lowering is obtained by using single points (single stud) spring rubber bases on the front and rear axles. In case, the 3 point or 4 point rubber bases installed by the manufacturer have to be exchanged accordingly (spare part available from DB agents) in case of corresponding accessories, as automatic shifting, air conditioning etc. However on the front the 3 point or 4point rubber bases must always be used in case of trailer operation (trailer coupling) on the rear axle, 3 point rubber basses must always be used.							
21. Excluding M-models, S4 models and cars with Audi sport chassis.							
22. For 16V + VR6 and TDI, we recommend to change to sportshock absorbers.							
23. We recommend to shorten the bump stops to 30mm.							
24. Lowering only suitable at the front axle.							
25. The bumpstop must be shortend to 45 mm.							
26. In the case cars with a level regulation facility, the rear of the car can be lowered by approx. 15mm if desired by changing the settings on the level regulation system.							
27. Not suitable for "Turbo" models.							
28. Special Tuning set. Installation must be done by professionals due to the extreme lowering of this setmodification may be necessary.							
29. The indicated lowering can differ up to 25mm due to different models and options.							
30. Not suitable for VR-6 models with Air Conditioning.							
31. The indicated lowering is the effective lowering. Standard lowering has already been considered.							
32. Not suitable for Kadett City.							
33. Not suitable for GTI/GLI/GTE/GLE/GSI models.							
34. Conical front spring.							
35. CYL.indrical front springs.							
36. Not suitable for cars with Full Options.							
37. Only for cars with Full Options.							
38. Not suitable for cars with Automatic Transmission.							
39. Only for cars with sportsuspension.							
40. Not suitable for cars with Air Conditioning.							
41. By choosing the lowering please note that the standard ride height in the front and in the rear is very different. After installations the lowering often appears to							

Ventura	Setnr	Description	Type	Year	Tüv	lowering	Notes
		<p>be different from the indicated lowering in the catalogue.</p> <p>42. Only suitable for 2 and 4 doors.</p> <p>43. Not suitable for G40 models.</p> <p>44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.</p> <p>45. We recommend to use shortend shockabsorbers for this set.</p> <p>46. Cut off one ring from the top of the bump rubber, always cut from the top.</p> <p>47. The bumprubber from the front: cut one ring off from the middle of the rubber and glu the top back on.</p> <p>48. This set is only useble with the original shock absorber. With other shockabsorbers the lowering set will not have enough preload.</p> <p>49. For the Volvo V70 with automatic level adjustment, you can use the original shockabsorber from the Volvo S80. (Most of them don't have automatic level adjusted shockabsorbers).Original Volvo shockabsorbern: 8671-712</p> <p>50. Mount the front spring with the progressive part up !!, this is very important.</p> <p>51. Take a good look how to mount the rear springs, this is very important.</p> <p>53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place</p> <p>54. Mount the rear spring with the white mark to the rear. This is very important.</p> <p>55. Mount the rear spring with the progressive part up !!, this is very important.</p> <p>56. Mount the rear spring with the progressive part down !!, this is very important.</p> <p>57. Mount the front spring with the progressive part down !!, this is very important.</p> <p>58. We recommend to shorten the rear bumpstop 10 mm.</p> <p>59. Cut off the piece of the bumprubber after the plastic ring.</p> <p>60. Lowering only suitable for rear axle</p> <p>61. Bumpstop front : cut off 2 rings bottom / bumpstop rear: cut off 1 ring bottom</p> <p>62. The bumpstop must be shortend to 40 mm.</p> <p>63. Bumpstop front: cut off 20 mm from bottomside and remove plastic ring</p> <p>64. The front bumpstop must be shortend to 20 mm.</p> <p>65. TUV is not suitable for 540i</p> <p>66. The front bumpstop must be shortend 15 mm from topside.</p> <p>67. Cut off 1 ring from bump rubber</p> <p>68. No TUV available on the stationwagon, only suitable on the saloon.</p> <p>69. TUV only suitable with normal original bumpstop or sport original bumpstop. Do not shorten the bumpstops!! With the sport bumpstop the lowering will be a little more and also the driving will be better.</p> <p>70. The MB E-class S211 has standard level adjustment at the rear. So the car can be lowered at the back by setting the level adjustment. Therefore this set only contains frontsprings.</p> <p>71. This partnumber is not GOCA (TUV) approved for Belgium.</p> <p>72. When used with a TUV certificate, be aware of the minimum height of the blinker/indicator. This must be at least 350mm. If this is not correct the blinker/indicator must be moved to another place.</p> <p>73. From chassis nr.: 400 001</p> <p>74. Till chassis nr.: 400 000 / set contains two different front springs, see code on springs</p> <p>75. Not suiteble for cars with multilink rear suspension</p> <p>76. Not suitable for cars with sportsuspension + S-line</p> <p>77. Only suitable for Touring cars with air suspension at the rear(set contains only front springs)</p> <p>78. Not for California</p> <p>79. Not suitable for cars with Hydractive III + suspension</p> <p>80. Not suitable for Qashqai+2</p> <p>TUV CERTIFICATES AND SPRINGCODES ARE AVAILABLE AFTER CONSULTING MERWEDE SALESTEAM.</p> <p>ALL CARS WITH ORIGINAL SPORT SUSPENSION OR CHANGED SPRING CHARACTER, WILL HAVE LESS REDUCTION OF RIDE HEIGHT.</p> <p>BY MOUNTING A SPRING KIT THAT LOWERS 55MM OR MORE, ONLY USE SHORTENED SHOCK ABSORBERS (REBOUND).</p>
